Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a radio system with transmitter and receiver at separate stations, classified in class 455, subclass 39.
 - II. Claims 2-9, drawn to a receiver, classified in class 455, subclass 130.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the radio system does not specific circuit details of a receiver. The subcombination has separate utility such as a receiver with utilizing variable gain amplification, delay compensation, etc. for processing received signal.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 3, drawn to a receiver of embodiment 2, Fig. 3, paragraphs 0089-0096.
 - II. Claim 4, drawn to a receiver of embodiment 3, Fig. 4, paragraphs 0097-0103.
 - III. Claim 5, drawn to a receiver of embodiment 6, Fig. 7, paragraphs 0116-0123.
 - IV. Claim 6, drawn to a receiver of embodiment 4, Fig. 5, paragraphs 0104-0111.
 - V. Claim 7, drawn to a receiver of embodiment 5, Fig. 6, paragraphs 0112-0115.
 - VI. Claim 8, drawn to a receiver of embodiment 7, Fig. 8, paragraphs 0124-0128.
 - VII. Claim 9, drawn to a receiver of embodiment 8, Fig. 9, paragraphs 0129-0135.
4. Claim 2 is generic to the following disclosed patentably distinct species: I, II, III, IV, V, VI and VII. The species are independent or distinct because as disclosed the different species have mutually exclusive characteristics for each identified species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another

Art Unit: 2618

species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
